computer and internet security presentation - 10/17/13 6! use anti-virus and anti-spyware software " detects and removes viruses and spyware from your computer " must be kept up to date

full virus list - amazon web services - you can isolate a computer virus, prevent it from spreading, repair and restore your files once you find an antivirus program able to diagnose and detect viruses. likewise, once an organization spots a cultural virus that is keeping things from happening as fast as they should, it can take steps to eliminate the blockage. for example, in one firm, managers routinely held pre-meetings before ...

create a csirt - carnegie mellon university - create a csirt background keeping organizational information assets secure in today's interconnected computing environment is a true challenge that becomes more difficult with each new "e" product and each new intruder tool. most organizations realize that there is no one solution or panacea for securing systems and data; instead a multi-layered security strategy is required. one of the layers ...
